

QBI install

First : Qlikview installed and always Override Security in user Preferences like this

Jser Preferences
General Save Editor Design Objects Font Export Printing Mail Locations Security License It is possible to override the built-in protection against hostile documents in QlikView. This will
make your system vulnerable to attacks by hostile documents.
Always Override Security
Module (Allow CreateObject and File Access)
🔽 Script (Allow Database Write and Execute Statements)
Launch (Start Programs and Documents from Button, Script and Module)
🔽 File (Save Document Export Data to Files)
Confirm Launch from Macro
